

Measuring and Monitoring Relays K8AB Series/61F-D21T

Industry First! Two SPDT Outputs Available in New Models DIN Sized at 22.5 mm

- Seven slim models featuring a variety of innovative new functions.
Single-phase power monitoring: Current relay, Voltage relay, Upper-/lower-limit voltage relays.
Three-phase power monitoring: Phase sequence relay, Voltage with phase loss relay, Voltage asymmetry relay, Voltage relay
- The K8AB-TH Temperature Monitoring Relay will join the Series in June, 2005.

Model Number Structure

Model Number Legend

K8AB-
1 2 3

1. Basic Model

K8AB: Measuring and Monitoring Relays

2. Functions

- AS: Single-phase Current Relay (One-sided operation)
- VS: Single-phase Voltage Relay (One-sided operation)
- VW: Single-phase Voltage Relay (Simultaneous upper and lower limit monitoring)

PH: Phase-sequence Phase-loss Relay

PM: Three-phase Phase-sequence Phase-loss Relay
(Simultaneous upper and lower limit monitoring)

PA: Three-phase Asymmetry and Phase-sequence Phase-loss Relay

PW: Three-phase Voltage Relay (Simultaneous upper and lower limit monitoring)

3. Rated Operating Power

Features

Industry First! Slim 22.5-mm Design Features Two SPDT Relay Outputs on Single- and Three-phase Power Supply Models

Many customers require the individual upper and lower limit outputs that are normally available only in larger 45-mm relays. For the first time from any manufacturer, OMRON has achieved this and more in a slim-body design measuring just 22.5 mm. These relays offer advantages such as 3-phase power supply compatibility and a relay contact capacity of 6 A at 250 VAC. What's more, they also reduce panel production cost because they use 50% less space than previous models.

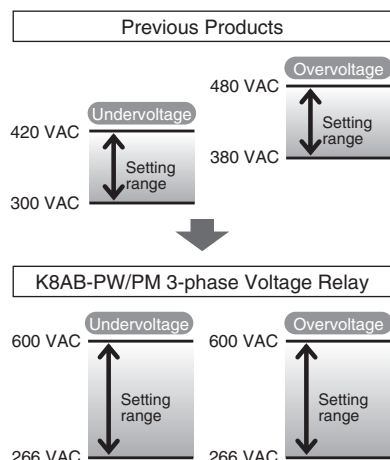

Pre-alarm Monitoring Mode (K8AB-VW Only)

To address this problem, the K8AB-VW features a pre-alarm monitoring mode with settings for pre-alarm outputs (H/HH alarms and L/LL alarms) separate from the trip outputs. The K8AB-VW makes scheduled maintenance viable because the pre-alarm monitoring mode provides advance warning of impending trip alarms.

Wide Setting Ranges

These new Relays offer full-span overvoltage and undervoltage range settings for unprecedented voltage monitoring flexibility.

DIP Switch Function Selection

Various relay functions can be selected using a DIP switch. This means that the number of models required can be reduced to 1/8 what it has been simply by installing a relay like the K8AB-AS. An added advantage is that it reduces the inventory of maintenance parts

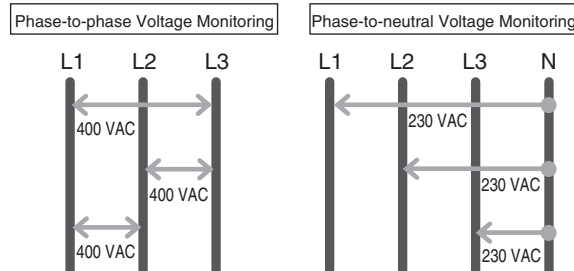

Example: K8AB-AS Single-phase Current Relay

	DIP switch		Function
Reset mode	SW2	OFF	Manual reset
		ON	Automatic reset
Relay operation mode	SW3	OFF	Normally open
		ON	Normally closed
Monitoring mode	SW4	OFF	Overcurrent
		ON	Undercurrent

- Note:** 1. A single K8AB-AS can be used for both instantaneous and time delay operation.
2. SW1 is not used.

A Single K8AB Monitors 3-phase Power Supplies with 3 or 4 Wires

K8AB-PM, PA, and PW can be used to monitor 3-phase power supplies with 3 or 4 wires simply by changing DIP switch settings.

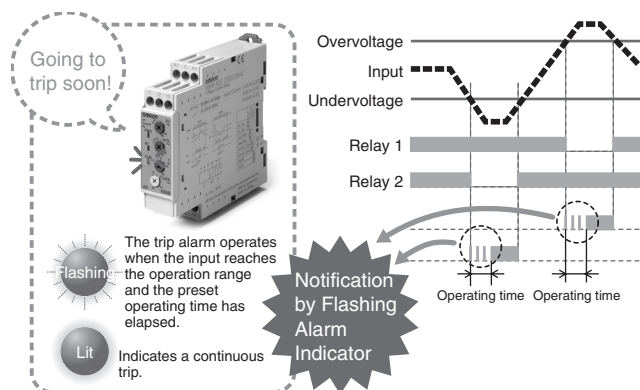

A Single K8AB Can Monitor a 3-phase Power Supply Anywhere In The World

Reduces Maintenance Parts Inventory

	SW3		ON	ON	OFF	OFF
	SW4		ON	OFF	ON	OFF
K8AB-PW1 (240 V)	SW2	ON	P-P	200 V	200 V	230 V
		OFF	P-N	115 V	127 V	133 V
K8AB-PW2 (480 V)	SW2	ON	P-P	380 V	400 V	415 V
		OFF	P-N	220 V	230 V	240 V

Operation Level Indication by Flashing Alarm Indicator

Checking the operating status has never been convenient because of the time it takes to reach the preset operating time. The K8AB eliminates this problem by featuring a flashing alarm indicator that clearly indicates the operating status. This has greatly simplified the task of checking on-site status particularly when operation settings are changed or an error occurs.

Ideal for Monitoring Current or Voltage

Current Monitoring Applications (Single Phase)

Application	Measured current	Applicable model	Setting range of operating value
Monitoring instrumentation signals of simple sensor controllers	4 to 20 mA DC	K8AB-AS1	2 to 20 mA AC/DC
			10 to 100 mA AC/DC
			50 to 500 mA AC/DC
Monitoring motor or heater current (Using a commercial CT)	0 to 1 A AC 0 to 5 A AC	K8AB-AS2	0.1 to 1 A AC/DC
			0.5 to 5 A AC/DC
			0.8 to 8 A AC/DC
Monitoring motor or heater current (Using a dedicated CT)	0 to 200 A AC	K8AC-AS3 (See note.)	---
			10 to 100 A AC
			20 to 200 A AC

Note: The model number of the dedicated CT is K8AC-CT200L (OMRON)

Voltage Monitoring Applications (Single Phase)

Application	Measured current	Applicable model	Setting range of operating value
Monitoring direct current (monitoring the output voltage of a shunt)	0 to 60 mV DC 0 to 100 mV DC 0 to 150 mV DC	K8AB-VS1 K8AB-VW1	6 to 60 mV AC/DC
			10 to 100 mV AC/DC
			30 to 300 mV AC/DC
Monitoring a power supply line	12 VDC	K8AB-VS2	1 to 10 V AC/DC
	24 VDC	K8AB-VW2	3 to 30 V AC/DC
	100 VAC		15 to 150 V AC/DC
	115 VAC	K8AC-VS3 K8AB-VW3	20 to 200 V AC/DC
	200 VAC		30 to 300 V AC/DC
	230 VAC		60 to 600 V AC/DC
	400 VAC		
	480 VAC		

Easy Wiring with Ferrules

2 × 2.5 mm² solid or 2 × 1.5 mm² standard ferruled.

A third party has certified CE mark compliance.

Approval for UL certification is pending.

Selection Guide

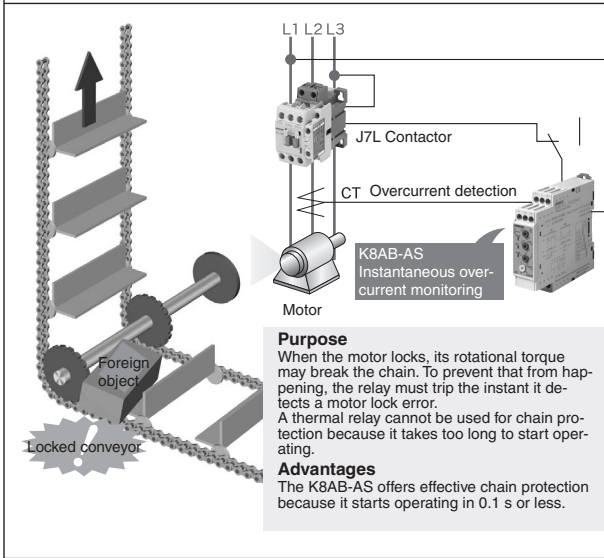

Item			Model	K8AB-AS	K8AB-VS	K8AB-VW	K8AB-PH	K8AB-PM	K8AB-PA	K8AB-PW
Functions	Single-phase power supply		Overcurrent/ undercurrent (switchable)	Yes						
			Overvoltage/ undervoltage (switchable)		Yes					
			Overvoltage/ undervoltage (window comparator)			Yes				
	3-phase power supply	3-phase 3-wire	Phase sequence				Yes	Yes	Yes	
			Phase loss				Yes	Yes	Yes	
		3-phase 3-/4-wire (Switchable) power	Phase sequence					Yes	Yes	
			Phase loss					Yes	Yes	
			Asymmetry						Yes	
			Overvoltage/ undervoltage (window comparator)					Yes		Yes
Output relays			One SPDT relay	Yes	Yes		Yes		Yes	
			Two SPDT relays				Yes		Yes	
Operation			Operation level setting	Yes	Yes	Yes		Yes	Yes	Yes
			Operating time setting	Yes	Yes	Yes		Yes	Yes	Yes
			Individual upper/lower limit settings (individual outputs)			Yes		Yes		Yes
			Function selection (DIP switch)	Yes	Yes	Yes		Yes	Yes	Yes
			Pre-alarm warning mode			Yes				
Indications			Power indicator/ Operating status indicator	Yes	Yes	Yes	Yes	Yes	Yes	Yes
			Trip warning indicator (flashing alarm indicator)	Yes	Yes	Yes		Yes	Yes	Yes
Safety standards			CE (See note 1.)	Yes	Yes	Yes	Yes	Yes	Yes	Yes
			UL	(See note 2.)	(See note 2.)	(See note 2.)	(See note 2.)	(See note 2.)	(See note 2.)	(See note 2.)

Note: 1. CE mark compliance certified by third party.

2. UL certification pending.

Applications

Chain Breakage Protection for Conveyors K8AB-AS

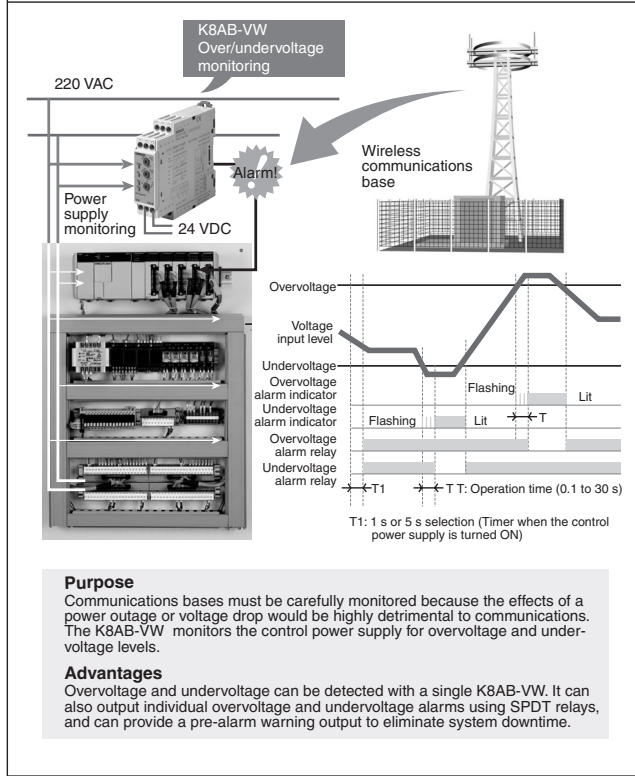

Battery Voltage Checking K8AB-VS

Protection against Idle Running of a Submersible Pump K8AB-AS

Monitoring the Control Power Supply at Communications Bases K8AB-VW

Bulb Burnout Detection K8AB-AS

Monitoring Phase Sequence or Phase Loss for Escalators K8AB-PH

Purpose
The K8AB-PH detects phase-sequence or phase-loss errors in escalator power supplies.

Advantages
A single K8AB-PH can detect the phase sequence or phase loss at startup and during operation.

Monitoring Compressor Power Supplies K8AB-PM

Fixed compressor

Mobile compressor

Purpose
Compressors cannot operate correctly when there is a voltage drop or voltage unbalance, or a phase-sequence or phase-loss error. The K8AB-PM can be used to monitor three-phase voltage, phase-sequence, and phase-loss errors.

Advantages
A single K8AB-PM can monitor overvoltage or under-voltage, as well as phase-sequence, and phase-loss errors in three-phase voltage. It can also output individual alarms for overvoltage or undervoltage using SPDT relays. This makes it possible to determine which type of error occurred.

K8AB-PM
Three-phase voltage, phase-sequence, and phase-loss monitoring

Controlling the Liquid Level in a Tank 61F-D21T-V1

Purpose
The 61F-D21T-V1 can be used to control the liquid level in a tank.

Advantages
Because the sensitivity resistance can be adjusted from 10 to 100 kW, there is no need to change models to match different liquid types and concentrations. You can also set the operation time in a range of 0.1 to 10 seconds to prevent operating errors due to chattering. Water supply and draining control can be changed by DIP switch.

Monitoring Generated Voltage K8AB-PW

Purpose
The K8AB-PW monitors the voltage of power generated by a generator. It also detects overvoltage and undervoltage in power from a generator.

Advantages
A single K8AB-PW can monitor three-phase voltage. It can also output individual alarms for overvoltage and undervoltage using SPDT relays because it features two outputs with SPDT relays. The voltage measurement range can be switched from 200 to 480 VAC, and the K8AB-PW can be switched to monitor phase voltage or line voltage.

Monitoring Voltage Generated by Wind-Powered Generators K8AB-PW

Purpose
The K8AB-PW detects overvoltage and under-voltage in power generated by a wind-powered generator.

Advantages
A single K8AB-PW can be used for a three-phase power supply with three or four wires. It can be used to individually set and output over-voltage and undervoltage alarms.

K8AB-PW
Simultaneous three-phase overvoltage and under-voltage monitoring

Single-phase Current Relay K8AB-AS

Ideal for current monitoring for industrial heaters and motors.

- Monitor for overcurrents or undercurrents.
- Manual resetting and automatically resetting supported by one Relay.
- Startup lock and operating time can be set separately.
- One SPDT output relay, 6 A at 250 VAC (resistive load).
- Switch the output relay between normally ON and normally OFF operation.
- Process control signal (4 to 20 mA) and commercial CT input (0 to 1 A or 0 to 5 A) supported.
- Relay warning status easily monitoring using LED indicator.

■ Ratings

Operating power	Non-isolated power supply	24 VDC (1 W)
	Isolated power supply	24 VAC (3 VA), 100 to 115 VAC (4 VA), 200 to 230 VAC (5 VA)
Operate (SV)	Operating value setting range	10% to 100% of maximum rated input value
	Operating value	100% operation at set value
Reset (HYS.)	Hysteresis	5% to 50% of operating value
	Resetting method	Manual reset/automatic reset (switchable) Manual reset: Turn OFF operating power for 1 s or longer.
Operating time (T)		0.1 to 30 s (Value when input rapidly changes from 0% to 120%.)
Operating power ON lock (LOCK)		0 to 30 s (Value when input rapidly changes from 0% to 120%; lock timer starts when input reaches approximately 30% of set value.)
Repeat accuracy		±10% (rdg) of operating value
Time error		±10% of set value (Minimum error: 50 ms)
Input frequency	K8AB-AS1/AS2	DC input, 45 to 65 Hz
	K8AB-AS3	45 to 65 Hz
Continuous input	K8AB-AS1/AS2	Continuous input: 115% of maximum input, 10 s max.: 125% of maximum input
	K8AB-AS3	Continuous input: 240 A, 30 s max.: 400 A, 1 s max.: 1,200 A
Input impedance		5 Ω max.
Indicators		Power (PWR): Green LED, Relay output (RY): Yellow LED, Alarm outputs (ALM): Red LED
Output relays		One SPDT relay (6 A at 250 VAC, resistive load)

■ Specifications

Ambient operating temperature		-20 to 60°C (with no condensation or icing)
Storage temperature		-40 to 70°C (with no condensation or icing)
Ambient operating humidity		25% to 85%
Storage humidity		25% to 85%
Altitude		2,000 m max.
Operating voltage range		85% to 110% of rated operating voltage
Rated power supply frequency		50/60 Hz ±5 Hz (AC power supply)
Output relays	Resistive load	6 A at 250 VAC ($\cos \phi = 1$) 6 A at 30 VDC (L/R = 0 ms)
	Inductive load	1 A at 250 VAC ($\cos \phi = 0.4$) 1 A at 30 VDC (L/R = 7 ms)
	Minimum load	10 mA at 5 VDC
	Maximum contact voltage	250 VAC
	Maximum contact current	6 A AC
	Maximum switching capacity	1,500 VA
	Mechanical life	10,000,000 operations
	Electrical life	Make: 50,000 times, Break: 30,000 times
Standards	Approved standards	EN60255-5 and EN60255-6
	Application standards	EN61326 and EN60664-1 (pollution level 2, overvoltage category III)
Terminal screw tightening torque		1.2 N·m
Crimp terminals		Two solid wires of 2.5 mm ² , two crimp terminals of 1.5 mm ² with insulation sleeves, can be tightened together
Insulation resistance		20 MΩ (at 500 V) between charged terminals and exposed uncharged parts 20 MΩ (at 500 V) between any charged terminals (i.e., between input, output, and power supply terminals)
Degree of protection		Terminal section: IP20, Rear case: IP40
Case color		Munsell 5Y8/1 (ivory)
Case material		ABS resin (self-extinguishing resin) UL94-V0
Weight		200 g
Mounting		Mounted to DIN Track or via M4 screws
Dimensions		22.5 (W) x 90 (H) x 100 (D) mm

Overvoltage and Undervoltage Operation Diagram

- Note:**
1. The K8AB-VW output relay is normally operative.
 2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

Overvoltage and Undervoltage Operation Diagram (Overvoltage Pre-alarm Mode)

- Note:**
1. The K8AB-VW output relay is normally operative.
 2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

Overvoltage and Undervoltage Operation Diagram (Undervoltage Pre-alarm Mode)

- Note:**
1. The K8AB-VW output relay is normally operative.
 2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

Nomenclature

■ Front

Indicators

Item	Meaning
Power indicator (PWR: Green)	Lit when power is being supplied.
Relay status indicator (RY: Yellow)	Lit when relay operates (Not light when both AL1 and AL2 are in error status) (Normally lit)
Alarm indicators (AL1 and AL2: Red)	Lit when there is an overvoltage or undervoltage. The indicator flashes to indicate the error status after the input has exceeded the threshold value while the operating time is being clocked.

Setting Knobs

Item	Usage
Voltage knob (AL1)	Used to set the voltage to 10% to 100% of maximum rated input voltage.
Voltage knob (AL2)	Used to set the voltage to 10% to 100% of maximum rated input voltage.
Operating time knob (T)	Used to set the operating time to 0.1 to 30 s.

Phase-sequence Phase-loss Relay K8AB-PH

Ideal for phase sequence and phase loss monitoring for industrial facilities and equipment.

- Simultaneously monitor phase sequence and phase loss for three-phase 3-wire power supplies.
- One SPDT output relay, 6 A at 250 VAC (resistive load).
- Relay warning status easily monitoring using LED indicator.

NEW

Ordering Information

■ List of Models

Model	Rated input voltage (See note.)	Function
K8AB-PH1	200 to 500 VAC	Phase sequence and phase loss monitoring

Note: The power supply is shared with the rated input voltage.

Ratings and Specifications

■ Ratings

Rated input voltage	Non-isolated	200 to 500 VAC (15 VA)
Phase sequence, phase loss operating time	0.1 s max. (value when rated operating voltage changes quickly from 0% to 100%) (Relays are normally ON and turn OFF for phase sequence or loss phase errors.)	
Resetting method	Automatic reset	
Input frequency	45 to 65 Hz	
Input impedance	100 kΩ min.	
Indicators	Power (PWR): Green LED, Relay output (RY): Yellow LED	
Output relays	One SPDT relay (6 A at 250 VAC, resistive load)	

■ Specifications

Ambient operating temperature		-20 to 60°C (with no condensation or icing)
Storage temperature		-40 to 70°C (with no condensation or icing)
Ambient operating humidity		25% to 85%
Storage humidity		25% to 85%
Altitude		2,000 m max.
Voltage fluctuation range		85% to 110% of rated input voltage
Input frequency		50/60 Hz \pm 5 Hz (AC power supply)
Output relays	Resistive load	6 A at 250 VAC ($\cos \phi = 1$) 6 A at 30 VDC (L/R = 0 ms)
	Inductive load	1 A at 250 VAC ($\cos \phi = 0.4$) 1 A at 30 VDC (L/R = 7 ms)
	Minimum load	10 mA at 5 VDC
	Maximum contact voltage	250 VAC
	Maximum contact current	6 A AC
	Maximum switching capacity	1,500 VA
	Mechanical life	10,000,000 operations
	Electrical life	Make: 50,000 times, Break: 30,000 times
Standards	Approved standards	EN60255-5 and EN60255-6
	Application standards	EN61326 and EN60664-1 (pollution level 2, overvoltage category III)
Terminal screw tightening torque		1.2 N·m
Crimp terminals		Two solid wires of 2.5 mm ² , two crimp terminals of 1.5 mm ² with insulation sleeves, can be tightened together
Insulation resistance		20 MΩ (at 500 V) between charged terminals and exposed uncharged parts 20 MΩ (at 500 V) between any charged terminals (i.e., between input, output, and power supply terminals)
Degree of protection		Terminal section: IP20, Rear case: IP40
Case color		Munsell 5Y8/1 (ivory)
Case material		ABS resin (self-extinguishing resin) UL94-V0
Weight		200 g
Mounting		Mounted to DIN Track or via M4 screws
Dimensions		22.5 (W) x 90 (H) x 100 (D) mm

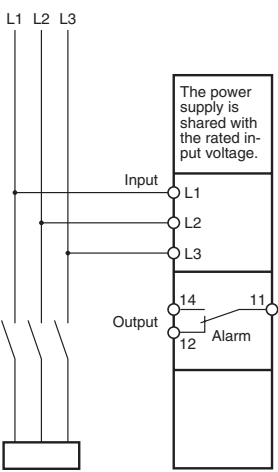

Connections

■ Wiring Diagram

Phase Sequence and Phase Loss Operation Diagram

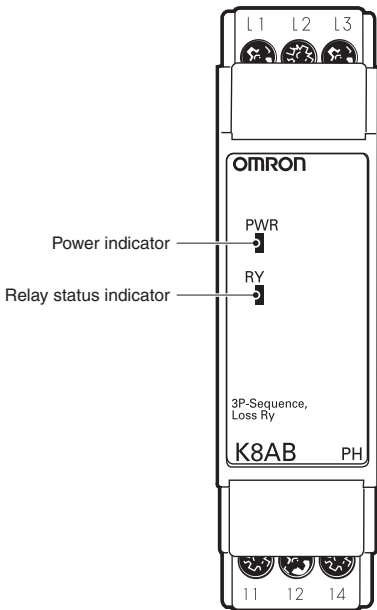

- Note:** 1. Motor load phase loss cannot be detected. To detect motor load phase loss, use the K8AB-PM or K8AB-PA.
2. The K8AB-PH output relay is normally operative.

Nomenclature

Indicators

Item	Meaning
Power indicator (PWR: Green)	Lit when power is being supplied.
Relay status indicator (RY: Yellow)	Lit when relay is operating (normally lit).

Three-phase Phase-sequence Phase-loss Relay K8AB-PM

Ideal for monitoring 3-phase power supplies for industrial facilities and equipment.

- Monitor overvoltages, undervoltages, phase sequence, and phase loss for three-phase 3-wire or 4-wire power supplies with just one Unit.
Switch setting for 3-phase 3-wire or 3-phase 4-wire power supply.
- Two SPDT output relays, 6 A at 250 VAC (resistive load).
Separate outputs possible for overvoltages and undervoltages.
- World-wide power specifications supported by one Unit (switchable).
- Relay warning status easily monitoring using LED indicator.

Ordering Information

List of Models

Model	Rated input (See note 2.)	
K8AB-PM1	3-phase 3-wire mode	200, 220, 230, 240 VAC
	3-phase 4-wire mode	115, 127, 133, 138 VAC
K8AB-PM2	3-phase 3-wire mode	380, 400, 415, 480 VAC
	3-phase 4-wire mode	220, 230, 240, 277 VAC

Note: 1. Three-phase 3-wire or 4-wire and the input range are switched using a switch.
2. The power supply is shared with the rated input voltage.

Ratings and Specifications

Note: 1. The K8AB-PA output relay is normally operative.
2. The power ON lock prevents unnecessary alarms from being generated during the instable period when the power is first turned on. There is no relay output during timer operation.

Calculating the Asymmetry Operating Voltage

Asymmetry operation condition = (Highest voltage – Lowest voltage) > Asymmetry operating voltage

Asymmetry operating voltage = Rated input voltage (V) × Asymmetry set value (%)

Note: The rated input voltage is selected and set with the DIP switch.

Nomenclature

■ Front

Indicators

Item	Meaning
Power indicator (PWR: Green)	Lit when power is being supplied.
Relay status indicator (RY: Yellow)	Lit when relay is operating (normally lit).

Conductive Level Controller

61F-D21T-V1

Ideal for level control for industrial facilities and equipment.

- Outputs can be set to self-hold at ON or OFF using self-holding circuits.
- Sensitivity adjustment of operating resistance from 10 to 100 k Ω for application to a wide range of liquids.
- Delay timer to prevent relay contact chattering caused by waves.
- CE marking, cUL application pending.

Model	Rated voltage
61F-D21T-V1	24 VAC 50/60 Hz
	115 VAC 50/60 Hz
	220 to 230 VAC 50/60 Hz

Specifications

Rated voltage	24 VAC, 115 VAC, 220 to 230 VAC
Operating voltage range	85% to 110% of rated voltage
Voltage between electrodes	6 VAC p-p (approx. 20 Hz)
Power consumption	Approx. 5 VA max.
Operating resistance	10 k Ω to 100 k Ω (variable)
Reset resistance	250 k Ω max.
Response time	Approx. 0.1 to 10 s (variable)
Cable length	100 m max. with completely insulated (600 V) cabtire cable with 3 conductors (0.75 mm ²)
Control output	6 A at 250 VAC for resistive load at 20°C, 1 A at 250 VAC for inductive load cos ϕ = 0.4 at 20°C
Indicators	Green LED: Power, Yellow LED: Control output
Ambient temperature	Operating: -20 to 60°C, Storage: -30 to 70°C (with no condensation or icing)
Ambient humidity	Operating: 25% to 85%, Storage: 25% to 85%
Elevation	2,000 m max.
Insulation resistance	100 M Ω min. (at 500 VDC) between power supply section, electrode section, and contact section
Dielectric strength	2,000 VAC 50/60 Hz for 1 min between power source section, electrode section, and contact section
Vibration resistance	Vibration of 10 to 55 Hz and acceleration of 50 m/s ² for 5 min 10 times each in X,Y, and Z directions
Shock resistance	100 m/s ² 3 times each in 6 directions on 3 axes

DIP Switch Functions

SW	Function	Function		Default
		OFF	ON	
SW1	Supply/drainage selection	Automatic liquid supply operation	Automatic liquid drainage operation	OFF
SW2	Not used.	Not used.	Not used.	OFF
SW3	Not used.	Not used.	Not used.	OFF
SW4	Not used.	Not used.	Not used.	OFF

Indicators

Item	Meaning
Power indicator (PWR: Green)	Lit when power is being supplied.
Relay status indicator (RY: Yellow)	Lit when relay is operating.

Setting Knobs

Item	Usage
Operating resistance knob	Used to set the operating resistance to 10 to 100 kΩ.
Operating time knob	Use to set the operating time to 0.1 to 10 s.

■ Safety Precautions

Precautions for Safe Use

The following precautions are essential to ensure safety. Always heed these precautions.

1. Do not use or store the Product in the following locations.
2. Mount the Product in the correct direction.
3. Do not touch the terminals when power is being supplied. Electric shock may occasionally occur.
4. Be sure you understand the contents of the Instruction Sheet and handle the Product according to the instructions provided.
5. Check all terminal numbers and polarity when wiring and wire all connections correctly.
6. Tighten terminal screws to the following torque. Recommended tightening torque: 0.54 N·m
7. Use the Product within the specified temperature and humidity ranges.
8. Do not use the Product in locations subject to flammable or explosive gases. Explosions may occasionally occur if the Product is used in such locations.
9. Do not install the Product in any way that would place a load on it.
10. Install an external switch or circuit breaker that complies with applicable IEC60947-1 and IEC60947-3 requirements and label it clearly so that the operator can quickly turn OFF the power.
11. For DC power, use an SELV power supply with overcurrent protection. An SELV power supply is one with double or reinforced insulation between the input and output and an output voltage of 30 Vrms and 42.2 V peak, or 60 VDC maximum.
Recommended power supply: OMRON S8VS-06024□

Precautions for Correct Use

Application

1. Do not use the Product in the following locations.
 - Locations subject to direct radiant heat from heating equipment
 - Locations subject to vibration or shock
2. Be sure that all settings are suitable for the controlled system. Unexpected operation possibly resulting in machine damage or accidents may result if settings are not suitable.
3. Do not clean the Product with paint thinners or other organic solvents. Use commercial alcohol.
4. Dispose of the Product as industrial waste.
5. Be sure to install the Product in a panel designed so that fire cannot escape to the exterior of the panel.

Installation

1. Use the recommended crimp terminals.
2. Do not block the area around the Product so as to interfere with heat dissipation. (The life of the product will be reduced if sufficient cooling space is not provided.)
3. To prevent electric shock, always turn OFF the power supply before starting wiring.
4. To prevent electric shock, always turn OFF the power supply before changing the DIP switch settings.

Noise Measures

1. Do not install the Product near equipment that generates high frequencies or surges.
2. When using a noise filter for the power supply, check the voltage and current and connect the noise filter as close as possible to the Product.

3. To prevent inductive noise, separate Product wiring as far as possible from high-voltage or high-current lines. Do not place Product wiring in parallel with or in the same path as high-voltage or high-current lines. Using separate conduits or ducts and shielded cables can also be effective. Operating Methods to Prevent Failure and Malfunction.

Preventing Failure, Errors, or Malfunction

1. Use a power supply that will reach the rated voltage within 1 s after the power is turned ON.
2. Use operating power, input power, and other power supplies and converters with suitable capacities and rated outputs.
3. Allow only qualified personnel to manage and handle the Product.
4. The distortion in the input waveform for the K8AB-AS, K8AB-PH, K8AB-PA, and K8AB-PM must be 30% max. If the input waveform is distorted beyond this level, it may cause unnecessary operation.
Do not use the K8AB-VS or K8AB-VW in circuits with waveform distortion. Error will be large due to waveform distortion.
5. Error will be large if the K8AB-AS, K8AB-VS or K8AB-VW is used for thyristor or inverter control.
The K8AB-PH, K8AB-PM, K8AB-PA, and K8AB-PW cannot be used for thyristor or inverter control.
6. Turn setting knobs from the minimum setting toward the maximum setting.
7. Connect phases in the proper sequence (K8AB-PH, K8AB-PA, K8AB-PM, and K8AB-PW).
8. Phase loss is detected for the K8AB-PH only when the phase loss occurs between the input contact and the power supply. Phase loss is not detected on the load side. Phase loss is detection only when the power is turned ON, and is not detected while power remains ON.
9. Phase loss can be detected only from the input contact to the power supply side by the K8AB-PH, K8AB-PM, and K8AB-PA. Phase loss cannot be detected from the input contact to the load side.

Warranty and Application Considerations

Read and Understand this Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS, OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

Take all necessary steps to determine the suitability of the product for the systems, machines, and equipment with which it will be used.

Know and observe all prohibitions of use applicable to this product.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Disclaimers

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON *Warranty and Limitations of Liability*.

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons. Consult with your OMRON representative at any time to confirm actual specifications of purchased product.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
